

Westpac KiwiSaver Scheme

Moderate Fund

Fund Update for the quarter ended:

30 September 2020

This fund update was first made publicly available on 29 October 2020.

What is the purpose of this update?

This document tells you how the Moderate Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. BT Funds Management (NZ) Limited¹ prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Moderate Fund aims to provide moderate returns over the medium term. The fund has a higher benchmark allocation to income assets than to growth assets. Volatility is expected to be higher than the Conservative Fund but lower than the Balanced Fund in the Westpac KiwiSaver Scheme.

Total value of the fund	\$ 666,758,816
Number of investors in the fund	37,404
The date the fund started	2 July 2014

What are the risks of investing?

Risk indicator for the Moderate Fund.²

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at westpac.co.nz/kiwisaverriskprofiler

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 30 September 2020. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	5.22%	3.83%
Annual return (after deductions for charges but before tax)	6.31%	4.84%
Composite of market index annual return (reflects no deductions for charges and tax) and peer group index annual return (after deductions for charges but before tax) ³	7.07%	4.80%

The composite index return reflects a composite of benchmark index returns, weighted for the fund's target asset allocation. The benchmark indices used for each asset class are defined in the Statement of Investment Policy and Objectives (SIPO).

Additional information about the market index and the peer group index is available in the SIPO on the offer register at disclose-register.companiesoffice.govt.nz.

Annual return graph³

This shows the return after fund charges and tax for each complete year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2020.

Important: This does not tell you how the fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Moderate Fund are charged fund charges. In the year to 31 March 2020, these were:

	% of net asset value
Total fund charges⁴	0.72%*
Which are made up of	
Total management and administration charges	0.72%
Including -	
Manager's basic fee	0.57%
Other management and administration charges	0.15%
Total performance-based fees	0.00%
Other charges	\$ amount per investor
Membership Fee ⁵	\$22.00

*Following a decrease in the management fee and the other management and administration charges, the Manager estimates that the total fund charges for the next scheme year will reduce to 0.66% of the fund's net asset value.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Jason had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Jason received a return after fund charges were deducted of \$383 (that is 3.83% of his initial \$10,000). Jason also paid \$22 in other charges. This gives Jason a total return after tax of \$361 for the year.

What does the fund invest in?

This shows the types of assets that the fund invests in.^{6 7}

Actual investment mix

Target investment mix

Cash and cash equivalents	7.00%
New Zealand fixed interest	24.00%
International fixed interest	29.00%

Philip Houghton-Brown was not named in the previous fund update for the Moderate Fund.

Further information

You can also obtain this information, the PDS for the Westpac KiwiSaver Scheme, and some additional information from the offer register at disclose-register.companiesoffice.govt.nz.

Notes

1. BT Funds Management (NZ) Limited is the scheme provider and Westpac New Zealand Limited is the distributor of the Westpac KiwiSaver Scheme.
2. The risk indicator for the fund is calculated based on the volatility of past returns over five years, which is not a full investment cycle. In some cases the output may be different if calculated using a longer timeframe. We believe an average investment cycle is generally considered to be a period of between 7 to 10 years. If the period of returns data that a risk indicator is based on was one of unusually low or unusually high volatility the risk indicator presented in a PDS (or any fund update) may provide a less reliable indication of the potential future volatility of a fund.
3. The return on the composite index has been used in the following ways, because there is no appropriate market index for the exposure to Other assets: in the How has the fund performed? table, and in the Annual Return Graph Index bars, applicable from 1 April 2016. A composite index may be a less reliable indicator of performance than an appropriate market index. The return for the peer group index used in the composite index and reflected in the table and the bar graph is net of fund charges and trading expenses (if any) but before tax.
4. The amounts specified include GST, where applicable.
5. Membership fees are the fixed dollar charges for membership in the Westpac KiwiSaver Scheme. You will pay this fee only once even if you are invested in multiple funds within the Westpac KiwiSaver Scheme.
6. For further information on each of the asset classes refer to the PDS and the SIPO.
7. "Other" represents investments in hedge funds.
8. "Other" is comprised of Alternative Investments, and can include hedge funds and absolute return funds.
9. The top 10 investments have been calculated excluding cash and cash equivalents held for operational and hedging purposes.
